TOWN WARRANT

STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Peterborough Qualified to
Vote in Town Affairs

You are hereby notified to meet at the Town House in said town on Tuesday, the eighth of March next, at nine of the clock in the forenoon, to act upon the following subjects:

1st. To bring in your ballots upon each of the questions submitted by the Convention to Revise the Constitution relative to the amendments proposed by said Convention at a session held on January 28, 1921.

2nd. To choose all necessary town officers and agents for the ensuing year.

3rd. To raise such sums of money as may be necessary for the maintenance of the poor, for the laying out and repairing of highways, and all necessary charges arising within the town, and appropriate the same.

4th. To raise and appropriate such sums of money as may be necessary for the support of the Fire Department, Public Library, and for the Grand Army on Memorial Day.

5th. To see what sums of money the town will vote to raise and appropriate towards paying the town debt and interest.

6th. To hear the reports of agents, auditors, committees, or officers, heretofore chosen, and passing any vote relating thereto.

7th. To see if the town will vote to instruct the Selectmen to appoint a police officer whose duty it shall be to preserve order in and about the public places in town, and perform such

other duties as are required by the Selectmen, both day and night, and such other police officers as may be required, and raise and appropriate money for the same.

8th. To see if the town will vote to accept legacies and gifts given to the town in trust by different individuals, the income to be used in the care of cemetery lots.

9th. To see what sum of money the town will vote to raise and appropriate to defray the expenses of Old Home Week.

10th. To see what sum of money the town will vote to raise and appropriate towards building the South Side Highway.

11th. To see what action the town will vote to take in relation to the care and management of the Adams Playground and raise and appropriate money for the same.

12th. To see what action the town will vote to take in relation to laying the dust in streets of the town, and raise and appropriate money for the same.

13th. To see what sum of money the town will vote to raise and appropriate for the purpose of protecting the trees of the town against insect pests.

14th. To see if the town will vote to replace one or more of the wooden bridges in town with stone, cement or iron bridges and raise and appropriate money for the same, or take any other action relating thereto.

15th. To see what action the town will take relative to erecting a fitting permanent memorial to the men who were in the United States Service during the world war and to raise and appropriate money for the same.

16th. To see if the town will vote to buy a One Ton Truck for the Highway Department, and raise and appropriate money for the same.

17th. To see if the town will vote to raise and appropriate the sum of \$1000.00 to continue the construction of the gravel road beginning where the work ended last year on the Greenfield Road. The same to be under the supervision of the highway agent.

18th. To see what action the town will take toward improving the condition of Windy Row and toward raising and appropriating money for the same.

19th. To see what sum of money the town will vote to raise and appropriate to build and repair sidewalks.

20th. To see if the town will vote to reimburse the Committee chosen to install the West Peterborough Water System for money expended over and above the appropriation, and to raise and appropriate money for the same.

21st. To see what sum of money the town will raise and appropriate towards the completion of the West Peterborough Water System, or to see if the town will take any other action relative thereto.

22nd. To see if the town will vote to put in a drain on Elm Street from Union Street to the river near S. G. White's Sons shop and raise and appropriate money for the same.

23rd. To see if the town will vote to put in four street lights at North Peterborough, at points to be located by the Selectmen and raise and appropriate money for the same.

24th. To see if the town will vote to raise and appropriate a sum of money for band concerts to be given by the Peterborough Cadet Band.

25th. To see if the town will grant the School District the use of the hall in the Central Fire Station for school purposes or pass any vote in relation thereto.

26th. To see if the town will vote to adopt the provision of the Curfew Law as set forth in Section 1-4 Chapter 172 of the Public Statutes and raise and appropriate money for the same.

27th. To see if the town will vote to give the Wm. H. Cheney Loyal Legion Post a deed of a suitable lot in Pine Hill Cemetery.

28th. To see if the town will vote to discontinue the highway leading past the summer residence of George D. Pushee, commencing about six hundred feet south of said residence thence north to the foot of the hill about eight hundred feet north of said residence.

Given under our hands and seal this 19th day of February A. D., 1921.

CHARLES S. PIERCE

FRED J. AMES

GEORGE E. CLEMENT

Selectmen of Peterborough.

Trustees of Trust Funds, Town of Peterborough

Peterborough, N. H., Feb. 2, 1921.

We the undersigned Auditors of the Town of Peterborough, N. H., hereby certify that we have carefully examined the foregoing account of the Trustees of Trust Funds of the Town of Peterborough, N. H., and find the same correctly cast and properly vouched.

F. K. LONGLEY
GEO. P. DUSTAN
A. J. WALBRIDGE
Auditors

Peterborough, N. H., Feb. 15, 1921.

Trustees of the Town Library

GENTLEMEN:

Herewith is presented the report of the Librarian for the year 1920-1921.

The circulation has decreased by about 1,700, this is largely due to the increased number of automobiles in town, and to the movies, many other libraries are reporting same conditions. The reading room attendance has increased by over 200.

Miss Ina M. Tenney was appointed assistant in March and relieves the librarian two afternoons and one evening a week.

School deposits were sent only to the South Village in 1920. The teachers in the other district schools not desiring them, but in January deposits were sent to the West as well as to the South. This naturally had some effect on the circulation as about 600 books circulate through the school deposits each year.

Owing to the increase in the price of books we are unable to add as many new books as we have been adding for the past three years.

Government bulletins on many subjects are freely distributed to the public.

Respectfully submitted

Chief Engineer's Report

PETERBOROUGH, N. H., FEB. 1, 1921.

TO THE SELECTMEN OF PETERBOROUGH, N. H.:

Gentlemen: As Chief of the Fire Department I wish to submit the following report of the department for the year 1920.

The Department has been fortunate in not having to respond to a very serious fire during the last year, though we have had a large number of calls, the boys have gone to the fire instead of waiting for the fire to come to them, hence the quick service that they have given has kept down the loss by fire.

While our Department is not a very extensive one we have to bear the after effects of the Great World War, in replacing our equipment and keeping it up to the standard.

During the year we have had to replace two sections of our heating plant, which went bad and made some changes in the piping of the Central Fire Station and with the present prices of labor and material the bills run into dollars very fast.

The equipment and apparatus of the Department is the same as last year with the replacement of some new extinguishers, 500 feet of 2½ inch fire hose pails and coats.

The equipment is as follows: One combination chemical and hose motor truck, one hand fire engine pump, "Aquarius," two hook and ladder trucks, hand drawn, three hose reels, 20 hand fire extinguishers, 2 hand force pumps, 60 pails, 2500 feet of 2½ inch linen fire hose, 200 feet ¾ inch chemical rubber hose, 62 shovels, 8 fire axes, 8 lanterns, and one 50 foot, two 35 foot, one 22, and one 20 foot extension ladders, also 150 feet of wall ladders and 4 roof hook ladders, 2 large grub hooks with ropes attached, 4 iron bars and a number of hand hooks.

The Department has responded during the year to 53 alarms, 45 still alarms or telephone calls and 8 gong alarms.

The members of the Department wish to thank the telephone operators at the Central Telephone office for blowing the fire signal also the test call at the noon hour.

The members of the Department and a number of our citizens would like to see the present hand drawn hook and ladder trucks replaced with a motor driven combination hook and ladder truck which would put your fire department at the head of any similar organization in the state.

As Forest Fire Warden I have issued 47 fire permits for the purpose of burning brush, rubbish, etc., during the year. The people want to use a little more care about setting fires, first get your permit, then if the conditions are right set your fire and have help enough to take care of it.

One word to those who smoke and to those who think they should smoke, don't throw your lighted match into the dry grass or leaves by the roadside, throw it with the stub of your cigar or cigarette into the middle of the road and it will save some trouble.

Respectfully submitted,

TIMOTHY E. DRISCOLL
Chief

Report of Chief of Police

PETERBOROUGH, N. H., FEB. 1, 1921.

Lodgers cared for	0

Respectfully submitted,

GEORGE F. MYHAVER
Chief of Police

REPORT OF THE SCHOOL BOARD

CITIZENS OF PETERBOROUGH:

The new era in educational matters that the state entered upon nearly two years ago has made no material change in methods so far as our schools are concerned. The re-districting, which took place under general supervision throughout the state, changed the towns with which we had been connected for some years but has not in any other way affected local conditions. Our closer relation with these five smaller towns should in time turn more of their advanced pupils to Peterborough High school advantages. Some pupils now come here from other towns. The superintendent now has charge of the schools in Bennington, Dublin, Francestown, Greenfield and Hancock. These towns together with Peterborough form the new Supervisory Union. Changing the financial year for the schools still calls for some criticism. It is difficult to estimate in February what will be needed for a school year that does not begin until the following September.

Under the new regime, instead of paying direct for supervision, we pay the state a tax of two dollars upon our school registration. Other minor changes call for additional reports from the Board.

The past year has been one of marked progress in spite of the unsettled conditions in educational matters as well as in business. We have been fortunate in obtaining efficient teachers for all outside schools as well as in the Centre building. Many school houses in New Hampshire and throughout the country have been closed through inability to get teachers.

TEACHERS

An earnest effort is made to employ teachers who are in sympathy with our ideals and have the preparation and ability to carry them out successfully. The year has brought many changes in our teaching force; only one of our former High school faculty returned. Changes in personnel are inevitable each year. We should like to make conditions so attractive in Peterborough that our best teachers would wish to stay with us longer. To accomplish this we need the co-operation of parents. Their encouragement and help should be extended to both teachers and pupils. The voting of money for schools, important as that is, should be supplemented by an active interest in the home regarding the child's welfare. Without this the teacher cannot accomplish what is expected of her. The scale of salaries has been sharply upward and provision has to be made for a moder-

ate increase. In fact there has been a general trend upward in every line of expense—fuel, books, repairs, etc.—all of which must be met. Your Board arranged to relieve the outside schools and teachers of the seventh and eighth grades and they are now brought to the Center, where they join our Junior High school and receive the training which cannot be given in the country schools.

It also gives the teachers more time for the lower grades remaining. This has increased somewhat our transportation expense.

CONDITION OF BUILDINGS

The crowded condition of the lower grades at the Center school, and our inability to obtain suitable rooms outside for the pupils, made some change imperative. To help remedy this one large room was divided by a partition and extra windows put in to furnish the required amount of light. This necessitated changes in the heating and ventilating system for these rooms. Additional radiation has also been put in the Manual training room, where conditions have been very unsatisfactory. Minor repairs have been made throughout the building where needed. At the South schools a new Kaustine sanitary system has been installed, which is giving very satisfactory results. At the Wilson Corner school water has been brought to the building which now has a lavatory and bubbler in one of the ante rooms. At the West both rooms have been wired for electricity and are now well lighted. This need came about through the opening of a night school there in connection with our Americanization work. The usual amount of repairs together with the extraordinary ones referred to has caused a deficit in the fund. We believe an examination of our school buildings will show them to be in very good condition and better than the average in the state, though far from ideal.

NEEDED REPAIRS

For the coming year with the expectation that provision will be made for a new building in the near future, repairs at the Center building are being kept at the lowest figure consistent with good sanitation. It is planned to install a Kaustine sanitary system at the North similar to the ones that are giving such good satisfaction at the West and South. The Wilson Corner school is to be painted inside to improve the lighting conditions. Other minor repairs on different buildings will be cared for.

NIGHT SCHOOLS

In conformity with the laws and to meet the desire of many who could not speak our language, and others who wished to qualify for citizenship, evening schools have been opened at the Center building and the West. Much interest has been shown, though the closing of the mills at the West, causing some families to leave, reduced the attendance and we have changed from three nights a week to only two. At the Center we had only two nights from the start. These schools not provided for in last year's budget have increased the general expense and added to our deficit.

MEDICAL INSPECTION

Medical inspection was started in Peterborough some years ago and now has been made compulsory throughout the state. Its results are manifest in our pupils. The next step toward the welfare of the children should be a physical instructor or district nurse, to follow up the medical inspection made by our physicians. The importance of this work can hardly be over estimated.

The Supervisory Union, consisting of the adjacent towns, at the meeting in Peterborough, appointed a committee to report upon this and the advisability of employing a capable person, who would divide her time among the several towns in the Union. This means some expense and has not been provided for in our budget but can be added if the people wish and take the necessary action.

ESTIMATES FOR NEXT YEAR

In spite of our efforts to keep down expense to the lowest figure, consistent with good work, the total shows an increase over last year. In order that every one interested may be fully informed as to present conditions and plans for the coming year, a statement and estimate of expenditures is appended to this report and posted with the Warrant for the School Meeting. It is hoped that every voter will take pains to read and consider these articles before the meeting. For details of the work in our schools you are referred to the Superintendent's report.

SCHOOL BUDGET

PURPOSE OF EXPENDITURE	Required 1921-1922	Raised 1920-1921
Salaries of teachers and superintendent	\$21,275.	\$17,500.
Fuel and janitor service	3000.	2,700.
Transportation of pupils	1800.	1,500.
Repairs	1000.	1,200.
Medical inspection	300.	300.
Salaries of school officers	300.	300.
Insurance	40.	40.
Books and supplies	1500.	1,300.
	<hr/> \$29,215.	<hr/> \$24,840.

Amount required for balance of year 1920-1921:

Repairs	\$900.
General fund	900.
Total amount to be raised	31,015.

In placing before the voters the above estimate of school expenses for the coming year, your school board will explain a few of the figures. The amount asked for to complete the present year, is \$900 for repairs and \$900 for general fund. Last year we raised \$1200 for repairs which at the time of the school meeting, seemed to us would be sufficient. Last Fall crowded conditions at our Centre school building made it necessary to divide one room into two putting in three new windows and changing the heating. Later new heating arrangements were made in the Manual Training Room which has never been properly heated before and electric lights were installed at the West school for use of the evening schools. The total repairs up to Feb. 12, 1921 amount to \$2,026.04 leaving this account overdrawn \$826.04, and we ask for \$900 to make up this deficit and to cover what minor repairs may be necessary from now until the end of the school year.

We ask for \$900 for the general fund which is made necessary because of the added expense of evening schools installed during the year and for which no provision was made last year and also cover the cost of teachers salaries which have been somewhat higher than we estimated a year ago. With these additional amounts we think that we can go through the balance of the year.

By adding the \$1800 asked for to the amount raised last year, you will find that for the coming year's expenses we are asking \$2575 more than asked for the year just closing. Of this increase \$200 is for books and supplies, \$300 for fuel and janitor service, \$300 for transportation; from this deduct \$200 less on repair account, leaves \$600 which deducted from \$2575 leaves \$1975 to be applied to teachers' salaries and other expenses.

MARGARET A. CLEMENT

GEORGE D. CUMMINGS

EDGAR A. BISHOP

School Board of Peterborough

Peterborough, N. H., Feb. 14, 1921

SUPERINTENDENT'S REPORT

TO THE SCHOOL BOARD OF PETERBOROUGH:

Herewith is submitted for your consideration my third annual report on the condition and needs of your schools. On looking back I find that it is the fifteenth issued by superintendents of the district.

TEACHERS

There was a large number of changes in the teaching force during the past year, and the school year opened in September with eleven teachers new to their positions at that time. The selection of these new teachers required considerable investigation and thought on the part of School Board and superintendent, and I am glad to report that the decisions arrived at have been proven wise. The force of teachers as constituted at present is efficient and capable, and the thoroughness of their work, and the enthusiasm they are putting into it is apparent to any one who has visited the different schools in the district. It is to be hoped that we shall not have to make many changes for the coming year. A corps of efficient and enthusiastic and loyal teachers is an asset to any community which cannot be measured entirely in money.

SOME IMPROVEMENTS

During the year a number of decided improvements have been made by the Board on some of the buildings in the district.

At the South school a Kaustine toilet system has been installed, thus doing away with the unsightly and unsanitary out door toilets which had been in use. The present toilets have been installed in a part of the hallway which has been partitioned off, and the entrance to both the boys and girls is had without going out of doors. The advantage of this is obvious.

At the Wilson Corner school the town water has been put in and a faucet and bubbler is in operation. The advantage of this needs no comment. To furnish an adequate supply of suitable drinking water to the rural schools is a problem not easily solved. One wonders, sometimes, why rural schools were built

formerly without ever considering this question, apparently. At the present time the school at the West has no provision for supplying drinking water.

At the West school electric lights have been put into both rooms. This was done in order to light the rooms suitable for the evening school which has been held there during the fall and winter. Oil lamps were tried at first but these proved to be entirely inadequate.

At the Center building a number of changes have been made. What was the fourth and fifth grade room last year has been partitioned off, thereby making two rooms in which are accommodated the first and second grades. The heating arrangement had to be modified somewhat. While the rooms as at present arranged are somewhat small, especially the first grade room, for the number of pupils accommodated, the arrangement is vastly superior to that of last year, when the first and second grades could come only part time.

An adequate supply of heat has been furnished the manual training room. Previously the room could not be heated to more than 30 or 40 degrees on cold days. At the present time it is possible to make it entirely comfortable in this respect. The mentioning of the above improvements show that the physical conditions surrounding the school children have received adequate attention in all ways possible.

ORGANIZATION

As indicated above the first and second grades are in separate rooms with two teachers for the grades. The third grade and the sixth grade, also, have a room and a teacher each. The fourth and fifth grades are together with 54 pupils under the charge of one teacher. This is a bad situation and ought to be remedied, but so far as present accommodations are concerned I see no way of effecting an improvement. Perhaps the district does not realize fully the evil effects resulting from a situation such as the above, both physically and mentally, but the results could be demonstrated I think, to any fair minded person. And the evil results where this situation has to be perpetuated year after year grow more decisive and permanent as time goes on.

In looking back over previous school reports I find that not since 1912 has the third, fourth, fifth and sixth grades, one or more of them, been in rooms with fewer than 48 pupils under

the care of one teacher, and two grades in a room. Here is the record:

Year	Grade	No. of pupils
1912	III, IV	58
1913	III, IV	52
1914	IV, V	48
1915	V, VI	48
1916	V, VI	54
1917	III, IV	51
1918	III, IV	52
1919	IV, V	52
1920	IV, V	54

The other grade combinations during the same period show almost equal overcrowding, and the different grade combinations in different years, the division of grades as frequently appears, all show an effort to adapt the organization of the Center school to the accommodations offered, rather than to provide the accommodations which an efficient organization would demand. The same process is going on now, and, of necessity, will continue until the district can devise some means of adequate housing. In the mean time the development of the pupils is suffering.

THE HEALTH OF SCHOOL CHILDREN

It is coming to be recognized that the health of school children plays a more vital part in their education than almost any other one factor, in fact, it is the foundation upon which all forms of human development must rest. This is especially true when viewed from the standpoint of the schools. No matter how good school equipment is, no matter how skilled the instruction is, if the child is not in a physical condition to benefit by these things, the results are bound to be disappointing. In a great majority of cases where children are backward in their school work, I believe an examination would show that there is something physical back of it; he might not be nourished properly, some physical deformity is preventing normal development, he is not getting the proper amount of sleep, and many other reasons might be discovered.

The habits of eating and sleeping of school children would be a fruitful line of investigation. Many times children come to school after an evening spent at the movies, a dance, or some other form of amusement in not fit condition to receive instruction, yet parents expect them to make normal progress. This is an impossibility where such habits are persisted in.

If the above observations are sound the logical conclusion is that every school district should make some adequate provision for taking care of the physical needs of its school children. In this connection comes up the question of a school nurse, working for the district, under the direction of the School Board, and subject to the needs of the school children. Such a nurse, as has been suggested, could be employed by several contiguous school districts, and the result of her work would, I feel confident, prove very beneficial. We have medical inspection, but, to make it effective, we need this other agency. This is a question which ought to be considered seriously.

ATTENDANCE

To this report is appended the usual statistical table for the year ending Aug. 31st, 1920. These tables are valuable for reference purposes. This report shows an increase over the previous year in the per cent. of attendance, it being 89.9%, compared to 85.5% the previous year. This is a good improvement, but is not nearly what it ought to be. The per cent. for the first eighteen weeks of this year is 93.6. This is encouraging and we may hope that by the end of the year we may reach 94%. A considerable part of this improvement is due to the efficient work of the truant officer who has spent much time and effort to check up the attendance. The results are satisfying.

Tardiness showed an increase over that of the year before, being 954, compared to 493 of the year before. Tardiness is an evil not considered seriously enough by many, and it is one that is likely to go with the child through life if he gets into the habit in school.

Along all lines of attendance improvement has been made this year. Forty-two are reported as not having been absent during the first 18 weeks. Tardiness is still too frequent and the co-operation of parents is necessary to remedy this.

THE HIGH SCHOOL

As to the work in the High school I will quote largely from the report of Headmaster Trafton.

"I am pleased with the general spirit of the school, and feel that I have the good will of the pupils without which I believe no teacher can be successful. The enrollment this year is smaller than that of the past few years due partially to a small entering class. The prospects seem good for a much larger number of pupils next year as we have an entering class of about 25. * * * *

I do not feel satisfied with the present course of study. This year a boy must either take the college course or the business course, for there is no other choice. Another course should be offered giving the boy or girl a good thorough training without requiring either Latin or commercial subjects. I feel that the school should also offer more science work, and suggest a course in Biology for either the first or second year.

We were forced this year, because of administrative difficulties, to combine the first and second year French classes. It has not proved successful, and I should never advise it again.

A wireless club has been organized among the boys of the school as a result of the sale of candy, money enough was obtained to buy a receiving set. The latter has been installed in the laboratory, and is proving both interesting and instructive. * * * * * We have also organized a school orchestra under the direction of Miss Clifford. * * * * * Electric gongs should be installed upon each floor for use in warning pupils of the beginning of school, and particularly for fire drill. The present gong cannot be heard at times either on the first or third floor. The chemistry laboratory should be equipped with a hood for use in experiments involving the making of poisonous gases. Under the present conditions the pupils are sometimes driven from the laboratory by the poisonous fumes. * * * * * One half of the High school is enrolled in the Commercial course. This is true not only in Peterborough, but also in many other towns. It seems to me that it is because it offers the quickest and most certain method of getting financial returns from the High School Course."

MUSIC, DRAWING AND MANUAL TRAINING

The music in the schools is showing steady improvement. I quote from the supervisor's report: "I feel that music is being recognized more and more as an important part of life and work of our Peterborough schools. It is gratifying to note the increase of interest in the subject of music among the children. Not only is this true of the school music, but also of applied music. More children are studying the piano and violin than formerly, and there is a greater desire on their part to know and perform good music. * * * * * The results of the past two years work are becoming apparent. More children are able to take part in the music recitation, and it is possible to accomplish more work and with a greater degree of efficiency. At the end of another year the schools will be up to grade in the course of music which we are following. A boy's glee club

has been organized in both the Senior and Junior High schools. This work is most valuable."

The work in drawing and manual training is along the customary lines with the emphasis placed upon the practical. From the supervisor's report I find the following articles have been made in the manual training classes among others: Bread boards, coat hangers, coat and hat racks, broom holders, magazine racks, book racks, window boxes, taborets, foot stools, and electric table lamps, the latter the boys wired themselves. The work in drawing includes all the phases usually taught in the grades.

THE NOON LUNCH

I quote from Miss Piper the following regarding the noon lunch. "A noon lunch has been served every day beginning with Nov. 1st., and will continue as usual until warm weather. The menu is sent to every room during the afternoon of the preceding day and all who wish to buy their lunches may order it any time before nine o'clock of the day on which it is to be served. The preparation of the food is done entirely by the cooking classes, each class being responsible for certain days in the week, and a committee of three girls chosen to serve. * * * * * The menus are so planned that a complete noon-day meal may be bought at school. * * * * * These are sold to the pupils at a price as near cost as possible. This month a new project is being tried; that of serving milk at five cents a glass to the children at recess time. * * * * *. The total receipts so far this year have been \$106, and the expenditures \$93, leaving a balance for the months of \$13.

The girls in the Junior High are making aprons and night-dresses. The freshmen are making dresses. The work has been rather hampered by lack of machines. The largest class numbers 22. There are only two machines, and the result is that a great deal of the girls' time is wasted in waiting their turn to stitch."

Other items of interest might be mentioned of the work in this department. I wish all interested might find time to visit this department. I wish to emphasize especially the new project which is being tried of serving milk at recess time. Many children would profit immensely if parents would see to it that they took advantage of this opportunity.

COST OF EDUCATION

The increasing cost of schools and of everything pertaining to education is a fact, viewed by some with anxiety and apprehension, and by others with a keen appreciation of the necessity

of keeping the training of the youth of the country at the maximum of efficiency. It is a fact, of course, that the cost of education has greatly increased. If it were not so we might justly surmise that its efficiency was being lowered. In the rapid rise of the cost of all kinds of human activity it is not to be wondered at that education has felt the effect. That it has responded in undue proportion to the rising tide, is, we may safely assert, not the case. Probably the reverse is true, and if comparative figures were at hand we should find that the cost of schools have not increased at the same rapid rate of many other forms of activity. However this may be we all realize probably, as never before, the necessity of keeping the schools at a maximum of efficiency. If this involves greatly increased cost this must be met, with an added determination that full value must be returned for the expenditure involved. This is the important phase of the problem. If the schools are to cost a great deal more they must return more to the community in a fuller development of the boys and girls resulting in a richer civic and economic life.

In all the present unrest and turmoil that is sweeping over the country we must look to the schools as one of the stabilizing factors in the situation. And especially is this true in a democracy such as ours where the general intelligence of the people is the prime condition of stability. Therefore no community can afford to let its schools deteriorate, not only because of the calamitous results to itself, but also because of the danger involved to the state and nation as well. No community can be a law unto itself. It touches other communities in so many important ways that a weakness in anything so vital as education is bound to affect the whole.

Permit me to express my hearty appreciation of the help of the School Board during the past year, and of the interest of so many of the townspeople expressed in so many ways.

Respectfully submitted,

L. E. PRIOR
Superintendent

We have examined the account of the Treasurer of the School District of Peterborough as found in this book, and find it correctly cast and properly vouched.

EBEN W. JONES

ARTHUR P. SMITH

Auditórs

Report of the Medical Inspector

The Board of Medical Inspection for the schools of Peterborough for the year of 1920 submit the following report for your consideration:

The Board is pleased to report that we find quite a marked improvement among the school children that have been examined in previous years, where physical defects were found and reported to the parents, although in some cases we regret to say, that year after year we find the same defects in the same child, and the parents have been notified of the exact condition and they neglect to have the defect removed.

We found during our inspection of the schools in the year of 1920 that 97 physical defects that were reported to parents in 1919 have been remedied.

We find a large number of physical defects (reported) are among the new children that have come to us from other schools, and the ones that are beginning school.

The Board of Medical Inspection have examined all the schools several times during the year of 1920, and on one occasion excluded 73 children on account of Pediculosis (lice) in order to protect the clean children.

The gross defects found are the common ones, such as defective vision, bad teeth, nasal defects, enlarged tonsils, adenoids, Pediculosis.

We have found the outstanding features of defects causing a large number of underweight children.

In arriving at a decision as to what constitutes an underweight child we refer to the following table which was used as a standard in the State of Missouri during the investigation of child Hygiene in 1920. The following table was prepared by that distinguished physician Thomas D. Wood, M. D., of Columbia University, New York, chairman of the National Council of Education:

RIGHT HEIGHT AND WEIGHT FOR BOYS.

Height inches.	5 yrs.	6 yrs.	7 yrs.	8 yrs.	9 yrs.	10 yrs.	11 yrs.	12 yrs.	13 yrs.	14 yrs.	15 yrs.	16 yrs.	17 yrs.	18 yrs.

ABOUT WHAT A GIRL SHOULD GAIN EACH MONTH

Age	Age
5 to 8.....	6 oz.
8 to 11.....	8 oz.
11 to 14.....	12 oz.
14 to 16.....	8 oz.
16 to 18.....	4 oz.

A child that is below normal in weight or height is usually due to malnutrition caused by some physical defect, or faulty habits, such as late bed-time hours, improper food consumption, or Toxic absorption from bad teeth, or Hypertrophied tonsilitis, in such cases there is an inability to properly assimilate food, and such children not only fail to gain to a normal weight and height, but they become fatigued easily, and at times have no ambition for work or play, and at other times are very irritable, and they are unable to do good school work, thereby they are always behind in their classes, in such cases the parents are doing their child a great injustice for not having the physical defect corrected. One of the most striking results of such a condition in a child is their lack of resistance against acute diseases.

The hygienic conditions of the outlying districts have been greatly improved thanks to the co-operation of the school board and the superintendent.

We regret to repeat again the crowded condition at the Center school building is becoming more and more congested each year. The absolutely inadequate quarters remain a pathetic negligence on the part of the people of Peterborough to provide suitable school accommodations.

It would seem as though the good people of Peterborough should not wait until the State Board of Health compels us to provide a more adequate School Building.

MEDICAL BOARD FOR SCHOOL INSPECTION.

SCHOOL WARRANT

To the Inhabitants of the School District of the Town of Peterborough, Qualified to Vote in District Affairs

You are hereby notified to meet at the Town House in said District on Thursday, the 3d day of March next, at 2.30 o'clock in the afternoon, to act upon the following subjects:

1. To choose a moderator for the ensuing year.
2. To choose a clerk for the ensuing year.
3. To choose a treasurer for the ensuing year.
4. To choose two auditors for the ensuing year.
5. To choose a member of the School Board for the ensuing three years.
6. To hear the reports of the agents, auditors, committees or officers heretofore chosen.
7. To raise and appropriate such sums of money as may be necessary for school purposes and repairs for the balance of the school year 1920-1921,
8. To raise and appropriate such sums of money as may be necessary for school purposes for the school year 1921-1922.
9. To raise and appropriate such sums of money as may be necessary to make repairs on school houses or other school property for the school year 1921-1922.
10. To see what sum of money the District will raise and appropriate for Medical Inspection in the schools for the school year 1921-1922.
11. To see what sum of money the District will raise and appropriate for salaries of school officers for the school year 1921-1922.
12. To raise and appropriate such sums of money as may be needed for Insurance on the school houses of the District for the school year 1921-1922.

13. To see if the District will vote to authorize the School Board to sell, rent or otherwise dispose of the school house and lot at the Happy Valley, so called, or take any action relating thereto.

14. To see if the District will vote to acquire a suitable site and erect a new school building thereon, and raise and appropriate money for the same or take any other action relating thereto.

15. To choose agents and committees in relation to any subject embraced in this Warrant.

Given under our hands this fourteenth day of February A. D. 1921.

MARGARET A. CLEMENT.

GEORGE D. CUMMINGS

EDGAR A. BISHOP
